

Calling all Baruch Undergraduate Researchers! Show off your work at an academic conference with students from around the world at ICUR 2021!

Apply now for the **8th annual International Conference of Undergraduate Research (ICUR) at Baruch College!** ICUR is an exclusively undergraduate two-day conference held on September 28-29, 2021, concurrently in Australia, the United Kingdom, Singapore, the US and elsewhere. It connects undergraduate presenters from across the world through video-conferencing. From here in NYC, you can talk to students in foreign countries! In 2020, 547 students from 13 institutions on 5 continents presented across 109 internationally linked webinar sessions!

At ICUR you can develop your communication skills by discussing your work in 15-minute oral presentations on a panel of students here at Baruch and in other countries linked via video-conferencing coordinated through the ICUR App. Even in the era of social distancing, ICUR allows you to connect with other undergraduate researchers across countries and disciplines, and enhance your CV too to prepare for graduate school or any career! The conference provides a supportive environment for talented young scholars, many of whom are doing and presenting research for the first time. Recent Baruch graduates can still present work completed while an undergraduate.

ELIGIBILITY

The conference is multidisciplinary! All undergraduate students with research to share are encouraged to apply. We welcome research projects that are the outcome of Honors theses, course work, group projects, summer internships or independent research. For group projects, please get consent from all group members/individuals involved prior to applying. **Students from all disciplines and perspectives can submit 250-word abstracts.**

HOW TO APPLY

It's easy to apply! You can submit a 250-word abstract by **Friday, June 2, 2021** using the online form <https://www.icurportal.com/abstract-submission/>

A panel will review all submissions and may give feedback for revisions. You will hear about acceptance by early July. For abstract-writing tips see:

<https://www.icurportal.com/resources/writing-an-abstract/> or contact Baruch's ICUR coordinator, Prof. Katherine Pence at Katherine.Pence@baruch.cuny.edu. See www.icurportal.com for more information.

Abstracts should include:

1. Clear statement of the original research question and contribution to the field
2. Clear statement of methods, sources, and/or data used and findings (or potential findings if it's a work in progress)
3. Demonstration of an understanding of recent developments in the field to which you are contributing
4. Clear expression of the context and potential impacts of the research

5. Language and terms accessible to specialist and non-specialist interdisciplinary audiences (specific jargon or terms from your specialty should be defined for those outside the field).
